

To Edit Your Pages / Articles

You can view and edit your created articles through the **Article Content Manager**. To see them go to **Content > Article Manager** from the top admin menu.

You will see all your pages/articles in the Article Manager. Once you click an article link, you will enter the **Edit** mode for that specific article. From the Edit menu you can modify the article's title, text, etc. as necessary.

If you want to view your changes, click Preview in the top right corner.
To save and preview your website, click Apply.
To save and close the page, click Save.

Use the drop menu above to apply the following tags that have **ALREADY BEEN ASSIGNED** by me when I created your site. This is **IMPORTANT**. If you start applying different fonts and colors to your text, it will lose the professional look of the site. Adhere to the styles listed below, and your site will retain a professional, quality look.

- Select “paragraph” for your text.
- Select “H1” for your page titles.
- Select “H2 – H3” for subheads on your pages.
